SUBJECT INDEX

Abrasion
gouging abrasion of wear-resistant alloy white cast irons, 15
Activated carbons
estimate of the dust attrition of granular activated carbons, 217
Additives
effect of additive concentration on the wear and friction of low alloy steel under conditions of boundary lubrication, 283
solubility problems with sulphurized sperm oil replacement extreme pressure additives II: solubility of additives in mineral base oil hydrocarbon constituents, 303
Algae
high temperature lubricants from biodeuterated materials produced by algae, 251
Aluminium
wear of 6061 Al test specimens during an in-bed exposure to an AFB cold model environment, 241
Attrition
estimate of the dust attrition of granular activated carbons, 217

Bearings
analysis of the effects of an electric current on contact temperature, contact stresses and slip band initiation on the roller tracks of roller bearings, 1
intertia effects in rheodynamic lubrication of a squeeze film bearing, 273
influence of fluid inertia on the operating characteristics of finite journal bearings, 229
Biodeuteration
high temperature lubricants from biodeuterated materials produced by algae, 251
Boundary lubrication
effect of additive concentration on the wear and friction of low alloy steel under conditions of boundary lubrication, 283

Carbon
estimate of the dust attrition of granular activated carbons, 217
Cast irons
gouging abrasion of wear-resistant alloy white cast irons, 15
Ceramics
chemical stability of ceramic cutting tool materials exposed to liquid metals, 163
tribology of Nb-coated SiC ceramics and the effects of high energy ion irradiation, 341
Chemical stability
chemical stability of ceramic cutting tool materials exposed to liquid metals, 163
Chromium
erosion of a Cr-plated tank gun barrel, 135
erosion–corrosion mechanisms and rates in Fe–Cr steels, 39
Chromium plating
erosion of a Cr-plated tank gun barrel, 135
Coatings
sliding wear studies of Ni–Cu composition-modulated coatings on steel, 259
tribology of Nb-coated SiC ceramics and the effects of high energy ion irradiation, 341
Composites
wear study of glass woven roving composite, 197
Contact resistance
contact resistance and wear behaviour of separable electrical contact materials, 177
Contact stresses
analysis of the effects of an electric current on contact temperature, contact stresses and slip band initiation on the roller tracks of roller bearings, 1
Contacts
analysis of the effects of an electric current on contact temperature,

© Elsevier Sequoia/Printed in The Netherlands

contact stresses and slip band initiation on the roller tracks of roller bearings, 1
contact resistance and wear behaviour of separable electrical contact materials, 177
Copper
sliding wear studies of Ni–Cu composition-modulated coatings on steel, 259
Corrosion
effect of particle variables on the erosion–corrosion of 9Cr1Mo steel, 53
effect of test conditions on the erosion–corrosion of alternate low alloy steel tubing alloys, 71
erosion–corrosion mechanisms and rates in Fe–Cr steels, 39
erosion–corrosion of steels in simulated and actual fluidized bed combustor environments, 85
Cutting
chemical stability of ceramic cutting tool materials exposed to liquid metals, 163
Cutting tools
chemical stability of ceramic cutting tool materials exposed to liquid metals, 163

Diesel engines
spherical particles generated during the running-in period of a diesel engine, 315
Ductile metals
thermal effects in the erosion of ductile metals, 105
Dust
estimate of the dust attrition of granular activated carbons, 217

Elastic properties
pressure spikes in elastohydrodynamics — some elastic considerations, 151
Elastohydrodynamics
pressure spikes in elastohydrodynamics — some elastic considerations, 151
Electric current
analysis of the effects of an electric current on contact temperature, contact stresses and slip band initiation on the roller tracks of roller bearings, 1
Electrical contacts
contact resistance and wear behaviour of separable electrical contact materials, 177
Erosion
effect of particle variables on the erosion–corrosion of 9Cr1Mo steel, 53
effect of test conditions on the erosion–corrosion of alternate low alloy steel tubing alloys, 71
erosion of a Cr-plated tank gun barrel, 135
erosion–corrosion mechanism and rates in Fe–Cr steels, 39
erosion–corrosion of steels in simulated and actual fluidized bed combustor environments, 85
thermal effects in the erosion of ductile metals, 105
Erosion–corrosion
effect of particle variables on the erosion–corrosion of 9Cr1Mo steel, 53
effect of test conditions on the erosion–corrosion of alternate low alloy steel tubing alloys, 71
erosion–corrosion mechanisms and rates in Fe–Cr steels, 39
erosion–corrosion of steels in simulated and actual fluidized bed combustor environments, 85
Extreme pressure additives
solubility problems with sulphurized sperm oil replacement extreme pressure additives II: solubility of additives in mineral base oil hydrocarbon constituents, 303

Ferrite
sliding sphere experiments on various single crystals of MnZn ferrite, 353
Fluid inertia
influence of fluid inertia on the operating characteristics of finite journal bearings, 229
Fluidized bed combustors
erosion–corrosion of steels in simulated and actual fluidized bed combustor environments, 85
Fluidized beds
wear of 6061 Al test specimens during an in-bed exposure to an AFB cold model environment, 241
Fretting
fretting of mild steel in air, 365

Friction
effect of additive concentration on the wear and friction of low alloy steel under conditions of boundary lubrication, 283

Glass
wear study of glass woven roving composite, 197
Grinding
grinding swarf, 329
Gun barrels
erosion of a Cr-plated tank gun barrel, 135
Guns
erosion of a Cr-plated tank gun barrel, 135

Inertia
inertia effects in rheodynamic lubrication of a squeeze film bearing, 273
Ion irradiation
tribology of Nb-coated SiC ceramics and the effects of high energy ion irradiation, 341
Iron
erosion–corrosion mechanisms and rates in Fe–Cr steels, 39

Journal bearings
influence of fluid inertia on the operating characteristics of finite journal bearings, 229

Liquid metals
chemical stability of ceramic cutting tool materials exposed to liquid metals, 163
Lubricants
high temperature lubricants from biodeuterated materials produced by algae, 251
Lubrication
effect of additive concentration on the wear and friction of low alloy steel under conditions of boundary lubrication, 283
inertia effects in rheodynamic lubrication of a squeeze film bearing, 273

Magnetic media
study by scanning electron microscopy of magnetic head–tape interface sliding, 123
Magnetic tape
study by scanning electron microscopy of magnetic head–tape interface sliding, 123
Manganese
sliding sphere experiments on various single crystals of MnZn ferrite, 353
Mild steel
fretting of mild steel in air, 365
Milling
relation between tool life in milling and in interrupted turning, 207

Nickel
sliding wear studies of Ni–Cu composition-modulated coatings on steel, 259
Niobium
tribology of Nb-coated SiC ceramics and the effects of high energy ion irradiation, 341

Oils
solubility problems with sulphurized sperm oil replacement extreme pressure additives II: solubility of additives in mineral base oil hydrocarbon constitutents, 303

Particles
effect of particle variables on the erosion–corrosion of 9Cr1Mo steel, 53
spherical particles generated during the running-in period of a diesel engine, 315
Pressure spikes
pressure spikes in elastohydrodyanmics — some elastic considerations, 151

Rheology
inertia effects in rheodynamic lubrication of a squeeze film bearing, 273
Roller bearings
analysis of the effects of an electric current on contact temperature, contact stresses and slip band initiation on the roller tracks of roller bearings, 1
Running-in
spherical particles generated during the running-in period of a diesel engine, 315

Scanning electron microscopy
study by scanning electron microscopy of magnetic head–tape interface sliding, 123
Silicon carbide
tribology of Nb-coated SiC ceramics and the effects of high energy ion irradiation, 341
Single crystals
sliding sphere experiments on various single crystals of MnZn ferrite, 353
Sliding
sliding sphere experiments on various single crystals of MnZn ferrite, 353
sliding wear studies of Ni–Cu composition-modulated coatings on steel, 259
study by scanning electron microscopy of magnetic head–tape interface sliding, 123
Slip bands
analysis of the effects of an electric current on contact temperature, contact stresses and slip band initiation on the roller tracks of roller bearings, 1
Solubility
solubility problems with sulphurized sperm oil replacement extreme pressure additives II: solubility of additives in mineral base oil hydrocarbon constituents, 303
Sperm oil
solubility problems with sulphurized sperm oil replacement extreme pressure additives II: solubility of additives in mineral base oil hydrocarbon constituents, 303
Squeeze films
inertia effects in rheodynamic lubrication of a squeeze film bearing, 273
Steels
effect of additive concentration on the wear and friction of low alloy steel under conditions of boundary lubrication, 283
effect of particle variables on the erosion–corrosion of 9Cr1Mo steel, 53
effect of test conditions on the erosion–corrosion of alternate low alloy steel tubing alloys, 71
erosion–corrosion mechanisms and rates in Fe–Cr steels, 39
erosion–corrosion of steels in simulated and actual fluidized bed combustor environments, 85
fretting of mild steel in air, 365
sliding wear studies of Ni–Cu composition-modulated coatings on steel, 259
Swarf
grinding swarf, 329

Tool life
relation between tool life in milling and in interrupted turning, 207
Tools
relation between tool life in milling and in interrupted turning, 207
Tribology
tribology of Nb-coated SiC ceramics and the effects of high energy ion irradiation, 341
Tubing
effect of test conditions on the erosion–corrosion of alternate low alloy steel tubing alloys, 71
Turning
relation between tool life in milling and in interrupted turning, 207

Wear
contact resistance and wear behaviour of separable electrical contact materials, 177
effect of additive concentration on the wear and friction of low alloy steel under conditions of boundary lubrication, 283
sliding wear studies of Ni–Cu composition-modulated coatings on steel, 259
wear of 6061 Al test specimens during an in-bed exposure to an AFB cold model environment, 241
wear study of glass woven roving composite, 197
Wear resistance
gouging abrasion of wear-resistant alloy white cast irons, 15

Zinc
sliding sphere experiments on various single crystals of MnZn ferrite, 353
